lecterns for meetings & conferences

Stand out from the crowd with an ILS lectern using sho-Q!

ILS offers a wonderful integration of touch monitor or all-in-one touch PC on a height adjustable pillar. All cabling is fed through the pillar for a very clean unobtrusive look. Due to the height adjustment options this lectern can be used seated as well as standing.

Side tables provide a horizontal platform for a glass of water, a computer mouse or documents, larger side tables are available to accommodate a laptop.

ILS22

22" touch glass surface monitor with integrated PC. Extensive controls via the extra built-in processor for the entire venue over IP, serial and relays.

With sho-Q you can automatically load your presentation in a few seconds from a USB thumbdrive or from the corporate presentations drive on the network.

Use sho-Q to automatically line up a dozen presentations for an event in advance. You can switch seamlessly from speaker to speaker, and jump to any slide in any presentation within seconds!

Use sho-Q to interact with your slides using a finger or pen on the touch screen. Insert a blank slide or annotate an existing slide using the built-in whiteboard functions.

ILS27

27" Lenovo multi-touch monitor with integrated PC. 2x XLR, USB hub, HDMI switcher. Aluminum floorplate, lockable casters.

ILS lecterns in use in a boardroom in Moscow, and the Delegate Hall in Brussels

ILS21

Flush mounted 22" HD interactive monitor with touchscreen, ultra-wide viewing-angle, IPS technology and powerful integrated PC.

Integrated notebook connection with automatic switcher, microphone, and reading light

ILS15

You can take a state-of-the-art All-in-one Touch/Tablet PC, mount it on our 3 position tilt VESA mount box, and drop the power supply in the top.

ILS11

Integrated notebook connections, microphone and reading light.

With sho-Q, you can easily embed movies, images, spreadsheets, documents or web pages into your Powerpoint presentations.
