ILS Synergy HT

ILS Synergy HT keeps the handrails exposed, where the WW-model optimizes the width of the wood.
Custom integration of tablets is also possible with this system.

The preferred option for this lectern is the Audio Upgrade which will add a speaker array in the front, making the lectern a fully self-supporting speaking system for rooms up to 100 people.

There is also ample room inside the lectern to house additional control systems by creating space inside the wooden surface.

Dimensions

Width	No side plates: 20cm pillar, 70cm top With side plates: 140cm top side plate size: 36cm x 26cm
Height	User side min: 80cm, max: 120cm Audience side min: 94cm, max: 134cm
