

ILS prides itself to build the highest quality lecterns around from thick aluminum profiles, blocks and plates, machined to a perfect fit and style. The lecterns are virtually free of maintenance for decades. In ILS products it is possible to remove a damaged part and renew it, or to make new fittings for future upgrades without affecting the rest of the installed system.

ILS Navigator AC delivers ILS quality with a smart design and cost-efficient solution. The solid top of the lectern is made of an anodized or coated aluminum. It is placed on a compact narrow cabinet (Half Rack Cabinet). The working surface of the Navigator series has a tilting range of 12 - 22°.

This solution also provides two fixed horizontal side tables (can be upgraded to the flip or sliding tables). This makes it possible to use handwritten notes, a laptop, or place a document camera on it. With a convenient connections panel you can plug your laptop into the HDMI socket to transmit the presentation to the big screen.

There is also a holder with built-in charging cables for tablets and smartphones. An XLR3 shock-mount suits most gooseneck microphones (optional 2 sockets) and a reading light with switch is included. The cabinet has a keyboard drawer and two lockable compartments with shelves to house a PC and other devices. The top compartment has a drop-down cover and a power strip to feed any laptop as well as hiding place for laptop power supplies. The larger compartment has a glass door and 2 shelves.

For ease of movement and stability of the lectern during the presentation, four lockable smart castors are provided. In addition, we will be pleased to engrave your logo on the front panel of the lectern, in case of using the system in formal events!

DIMENSIONS

Width	<p>Top: 720 mm x 535 mm Side Plate: 300 mm x 370 mm Top + Side Plate: 1365 mm Cabinet: External: width: 485 mm height: 850 mm depth: 470 mm Internal: width: 305 mm height: 615 mm depth: 460 mm Tilt adjustment: 12° - 20°</p>
