ILS presents its newest member of the **SpeakersCorner** family of lecterns with the 32" / 80 cm wide and 128 cm tall lectern for general use and designed it to fit in more traditional wood paneled environments.

By developing a special corner aluminium profile the construction of the lectern (podium) is greatly simplified yet very solid. As ILS has its reputation in building the highest quality aluminium lecterns machined from thick blocks/profiles and sheets, we had to apply our strengths to this design as well. The user will find a practical all aluminium console which can be fitted on different heights inside the wood structure. Several different layouts are available.
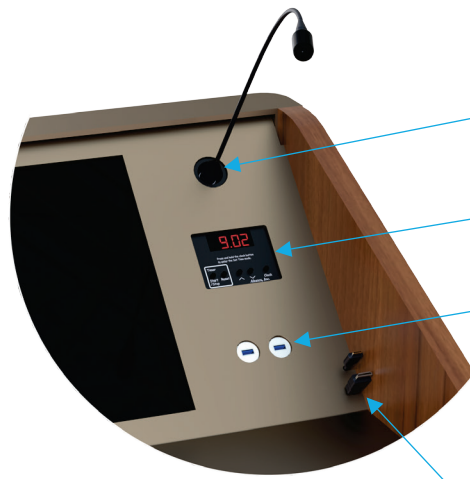

DIMENSIONS

Width	**Cabinet**: 810 mm
	Top surface (where you can place the laptop or notes): 753mm
	Open shelf: 752 mm
	Keyboard shelf: 718 mm
Height	**User side**: 1027 mm with casters
	Audience Side: 1287 mm with casters
	(**casters height**: 72 mm)
	Open shelf: 152mm
	Keyboard shelf: 40 mm
Depth	**External**: 600 mm
	Internal: rack dimensions
	Top surface (where you can place the laptop or notes): 290 mm
	Open shelf: 450 mm
	Keyboard shelf: 350 mm

INTEGRATION

Op con a	• A 22" pen and touch interactive monitor installed on a 12° slope from WACOM or QOMO, with a small console above holding the timer and connectivity
	• A smaller 15.6" 4K touch monitor plus an Extron or Crestron control system next to it
	• A 32" touch monitor with all controls embedded (ILS Synergy IM technology)
	• The server rack may receive pre-installed shelves
	• The casters may be hidden behind a skirt around front and sides, as this brings the wheels further inside, the lectern should be in a stable place
Features	• keyboard drawer with palm rest and space for a mouse
	• Alzatex mounted timer/clock
	• Microphone has a shock-mount (Monacor)
	• Several matrix switching options 5x3 4K@30Hz and 4x4 4K@60Hz, wireless & multi-viewer
	• Space for documents etc…
	• Actively ventilated with a quiet fan and a convection path for cooling is designed in
	• Your Logo – reverse printed on acrylic plate
	• 4 x Lockable smart castors

The microphone has a shock-mount (Monacor)

Alzatex mounted timer

2 x USB sockets

2 x connection wires up for HDMI and USB-C (any number and types can be chosen) to use with the laptop

Wood enclosure on aluminium

Sloped area holding an Iiyama 22" touch monitor flush mounted

The console, laid out with a flat segment for laptop and keyboard use

Under the console is a sliding out keyboard drawer with palm rest and space for a mouse

Weighty steel bottom plate with optional skirts

4 x Lockable Smart Casters

- A 12RU server cabinet is placed under the system featuring a glass lockable door and optionally provided with a number of shelves as required, with adequate space for multiple PC systems.

- The cabinet is actively ventilated with a quiet fan and a convection path for cooling is designed in.

- The cabinet is attached with magnets inside the case and can be pulled out and stand on its own wheels when out to access all sides.
