

The ILS sho-Q Seminar Planner and Presentation Delivery Support System is specially developed for intelligent lecterns with large touch screens for quick and easy control. Sho-Q is a completely intuitive interface for presenting PowerPoint files and it requires no training. Start a presentation with one touch by selecting the first slide. You can also select any slide from any presentation while the audience views continuous information.

Sho-Q allows for easy insertion of presentations that are stored on a USB stick. Sho-Q really delivers productivity and contributes to professionalism in meetings.

all presentations selection

staged slide animation control

previous/current/next slide & notes

instant selection from all slides

write annotations in "pen mode"

### Sho-Q

Sho-Q makes presentation delivery simple, efficient and comfortable:

- Control multiple presentations from within the application makes for fast presenter changes and seamless continuity
- View the current slide, next and previous slide, slide notes and a timer simultaneously. Write annotations on your slide
- Context-sensitive user interface appear when needed to control embedded media, animations and staged slides
- Set up an entire seminar of different presenters within a single sho-Q structure for a one-touch start of each presentation
- Automatic inclusion of presentations brought on USB-sticks and its proper deletion when removed.

ILS - Intelligent Lectern Systems - develops out-of-the-box presentation solutions.

Appliance-like hardware and software combinations deliver productivity and professionalism in seminars, lectures, meetings and conferences.

19 out of 20 Presenters today use Microsoft PowerPoint for visual support of their speeches. Swapping notebooks or programs in meetings and conferences cause disruptions due to different system settings, synchronization difficulties with projectors and exposure of cluttered desktops. ILS eliminates this completely.

### Productivity and Professionalism are key to ILS

The systems

- Use intuitive means to realize a professionally conducted event
- Contribute to improvement and retention of presentations
- Improve the presenter's confidence and perceived authority
- Help avoid meetings exceeding their schedules
- Significantly reduces presentation errors
- Eliminate error-prone use of presentation technology
- Access any slide from any presentation instantly
- Deliver data security
- Automate instant use of USB sticks and remotes
- Ensure easy control of embedded animations
- Provide compact industry standard solutions
- Warrant good long term support
- Lower production cost over custom designed systems

ILS22  
Sho-Q Presentation system

ILS is a unique company offering the widest and most complete set of presentation solutions. For presentation appliances that work right out-of-the-box or for flexible systems adapted to your needs by your expert AV systems integrator.

Portfolio of real-time streaming, and distance learning options at various levels of performance, are available through a number of ILS close partnerships

### Intelligent Lectern

ILS coined the concept of the intelligent lectern. It is defined as a lectern with integrated PC and a large touch screen. An intuitive user interface controls multiple Powerpoints. The presenter gets to view more information on the screen than is visible to the audience.

Typical features include:

- exploiting extended and cloned dual display modes
- wiring for a cardioid condenser microphone
- simple switching capability for external devices to access the projector

ILS products combine knowledge, innovation, style and genuine build quality from the Netherlands, Germany and Switzerland. ILS delivers ADA compliant height adjustment.

Select from a wide range of Teaching Solutions and Formal Lecterns.

## Hardware

ILS makes and distributes a range of appliance-like digital lecterns with integrated large touch screens and modern PC power. The compact floor standing models offer marked differences in style and function, pen-and/or easy finger touch interaction. Next to pedestal and cabinet based models, ILS offers portable lectern systems for table top use. ILS lectern modules with the same functionality integrate in larger wooden lecterns, podiums and desks specified by architects.

### ILS 16P SpeakersCorner

Beautiful workmanship in a pillar style pre-wired lectern with tilt-table touch display options.

Includes 4-way USB and serial rotary dial plus EXTRON 4-way VGA+audio switch to select inputs: internal PC and 1-2 extra notebooks and/or visualizer. An additional 2-way VGA/audio switch assures continuous display. Inside cabinet is ample room for any common PC. 2 Microphones sockets, LAN and USB hubs. Comes pre-wired for all devices.

Use with SMART Sympodium ID370 17" pen display or other. Upon request we integrate our standard PC solution. Room for 2 extra notebooks or visualizer on the wing tables. Just plug them into the connectors.

### ILS 24P SpeakersCorner

Same power, more flexibility, more space... full 19" square rack inside. Insert a powerhouse for streaming presentations, control audio and camera. All the tools integrate into one beautiful podium to broadcast your subject or share your knowledge.

Dual switching for continuous display.  
Tablets height adjustment convenience.  
Use with SMART Sympodium DT770 17" dual touch display or any other.  
Optional EZ control room control system

### ILS 24D SpeakersCorner

Dual switching for continuous display.  
Dual display configurations on the lectern to cover dual wide screen projection. Tablets height adjustment convenience.

### ILS 24G SpeakersCorner

Full functionality is achieved and controlled with ILS22G integration. (See next page). Install Sho-Q Presenter on any SpeakersCorner to instantly access multiple presentations seamlessly

### ILS-14PA

The ILS14PA is the first in a series of cost-effective well-designed multimedia classroom lecterns. You only need to add your own PC, everything else that is needed in a lectern is included: 19" 4:3, or 20" wide screen pen monitor, 240 watt amplifier, gooseneck and wireless microphones, notebook interface panel. There also is an integrated controller for external devices, and devices that are added inside the 19" rack bay. Optional matching teacher desk.

### ILS 15RT Tabletop Presenter

You can experience the delivery performance of sho-Q with the ILS15RT low budget solution aimed at smaller conference rooms. Benefit from its productive use in meetings, conference workshops and break-out sessions. Adds portability too.

Works right out-of-the-box with sho-Q pre-installed.

Resistive touch PC integrated 3GHz Dual Core power.  
DVD, 4 USB, 2 Firewire, SD card reader, PC audio I/O, VGA out, 1 serial port, LAN, PS2 keyboard/mouse ports on solid lectern oriented table top stand. Includes 2GB RAM, 20GB HDD, XP Pro and Sho-Q presentation management software license.

### ILS-17S

Very nice and efficient lectern for boardroom and events.  
17" touch screen, built in mini PC, height adj. electric pedestal, steel with wood top, reading light option, flush glass of display with surface.  
Built in high performance mini PC, generous electrical height adjustment

### ILS 21RL Sho-Q Presentation System

Sleek 20" wide screen touch monitor with latest PC package on solid floor-standing foot with electrical height adjustment.  
Comfortable grips, decoupled XLR mic socket and lighting over DIN A4 / A-size area next to the monitor.

Combined with sho-Q presenter support tools, the system adds confidence to the user - and productivity to meetings - with seamless execution of multiple presentations.

Instantly select any slide from any presentation.

Includes Core2Duo PC, Intel m/b, 2GB, 80GB HDD, XP Pro or VISTA; Front access: 3 USB, 1 Firewire, DVD, multi-card reader; Top: electrical height control switch, reading light switch; XLR3 microphone socket, XLR4 little socket; Monitor: 20" wide screen resistive touch; Output: XLR3, PC audio jack, LAN, DVI-D; A-size paper area; Options: VGA sub15, reading light and microphone.

Order the ILS 21RT for the portable tabletop lectern version.

### ILS 22G Sho-Q-box Lectern System

Our top model ILS 22G represents a series of very advanced all-in-one presentation solutions. The very versatile flat package consists of touch glass lectern top, high performance industrial grade board PC and 22" wide monitor with control functions around the display.

Specifications: Front DVD slot, 4 USB; Internal: Core2Duo T5500 80GB HDD; I/O: DVH, 3x RS232, 10x relays, LAN, MiniXLR3, MiniXLR4, Microphone with pre-amp; PC Audio; Controls: on/off projector, lights, touch, audio level, microphone mute/adjust, display mirror/span, shortcuts to sho-Q, desktop, jump any other defined functions, and more...

All presentation technology you wanted from a lectern is implemented in this 25.5" x 20" x 1.5 - 3" thin package. Drop in, or integrate on any wooden custom designed lectern or podium; put it on the table as a portable lectern; or buy it with the ILS electrical lift pedestal; or its SpeakerCorner cabinet for a complete solution.

The ILS 22G makes use of ground-braking multi-frame direct touch technology that uses multiple sensors to control both the touch screen driven software and the selective back-lit touch fields for keyboard and mouse, for annotation, room and source control and direct PC control functions - all from a single glass plate. Functions visible only when needed.

ILS holds all design, production and marketing rights worldwide to the SpeakersCorner family, to its ILS21 and ILS22 lecterns and its sho-Q software.
