ILS Presentation Systems. Better for presenters and teachers, better for your audience !

ILS27D lectern platforms for integration of touchPC's (DELL 7000 series, Lenovo ideacenter A740)
ILS25V lectern platform for VESA mountable touchPC systems

The new ILS27D and ILS27V are revolutionary presentation appliances that are perfect for board meetings, press conferences, seminars, lectures and formal speaking events. The broad application of these novel lecterns is the result of a VESA mount plane on which to mount multi-touch technology of all-in-one touchPC's to present with ease from this height adjustable lectern.

When selecting the appropriate vehicle to do your presentations (either install yourself or purchase with the proper engine installed) you can use our sho-Q presentation suite software to eliminate distractions. This will improve your presentation and lets you deliver your speech with ease and confidence. Your audience is captivated and retains more of your message. sho-Q allows you to see your presentation notes, preview the next slide, live annotate your slides, documents, video or web pages. You can control multiple Powerpoint presentations with a single touch, jump to any slide in any presentation. And more! When you order a lectern with a high performance industrial PC, sho-Q will be automatically included.

The ILS27D and ILS25V are stylish all-in-one presentation consoles with lectern stands made out of solid aluminium,. The beautiful shape is unique in the industry. It comes on a very stable stand that is electrically height adjustable, with a top rim that includes a shock-mount for XLR based microphone, a reading light and switch, a USB hub to insert your presentations and side connectivity for laptops, and VGA/HDMI/DP/audio/LAN/USB sockets.

When you wish to integrate an all-in-one touchPC, please state the model and make to ILS with your order to assure the correct clamps and levelling plates are included. The VESA mount feature of the ILS25V will allow adjustment for size and thickness within certain limits. Again best to state the intended monitor model and make when ordering. Monitor sizes from 22" – 32" have been fitted successfully from various brands.

Specifications:

65cm wide top independent of inserted touch technology
Pillar height adjustment range 35 cm
Attachable side tables one each side of 30x45 cm in portrait or landscape
Connectivity: VGA/HDMI/DP/audio/LAN/USB sockets
Optional: Gooseneck w condenser mic cartridge
